

“

FIRST is more than robots. The robots are a vehicle for students to learn important life skills. Kids often come in not knowing what to expect – of the program nor of themselves. They leave, even after the first season, with a vision, with confidence, and with a sense that they can create their own future.

Londonderry, NH

WHO ARE THESE PIRATES, ANYWAY?

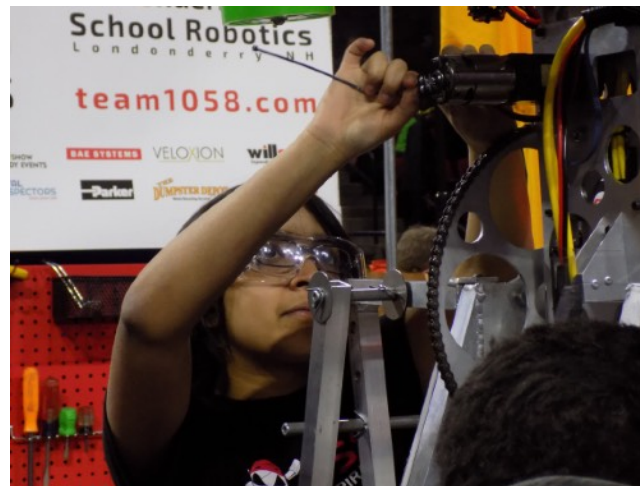

Londonderry High School Robotics participates in the FIRST Robotics Competition (FRC), an international robotics program inspiring students to pursue STEM careers. Each year, our students design and build a large (~120 lb) robot - from scratch - with the guidance of adult mentors. Additionally, students inspire younger students by creating and running robotics programs in other schools, and participate in a wide range of real-world engineering and business supporting activities.

Our goal is to promote learning and experiencing real-world engineering and business by having fun and working hard.

ACCOMPLISHMENTS

- 2017: Top 12 team worldwide
- Participate in 10 competitions each year since 2003
- Won the Chairman's Award – the most prestigious FRC award – four times
- Started 4 new FIRST teams, and actively mentor 5 teams locally
- Host and participate in 20 community outreach events each year
- Attended FIRST World Championship 6 times

KEEPING THE SHIP GOING

A lot of time, energy, resources, and money are needed for a successful FRC program, with a typical annual budget of over \$30,000.

- Londonderry High School provides meeting space and storage.
- Parents and team supporters provide transportation and meals.
- Corporate sponsors provide for registration fees, materials, equipment, supplies, and allow us to provide this valuable opportunity **at no cost to students.**

We welcome your donation of time, goods, services, and of course, monetary contributions. team1058.com/donate
